PETERSON'S NEW BLUE LED PEDESTRIAN LIGHT INCREASES SAFETY OF UTILITY VEHICLES

NEW!

PERFECT FOR FORK LIFTS

Peterson's new 920B-MV blue safety warning spotlight is designed to protect pedestrians working in and around equipment such as fork lifts, sweepers, salt spreaders, ag sprayers, automated guided vehicles (AGVs) and self-propelled industrial service equipment. The distinctive blue light is not only noticeable when looking at the vehicle, as other warning lights would be, but it throws distinct spot of blue light onto the ground in front of the vehicle, alerting pedestrians even when the vehicle is approaching from behind walls or obstructions. It's bright enough to be distinctly noticeable even in brightly lit areas.

2
diodes

920B LED Blue Pedestrian Safety Warning Light

- Two 5 watt blue diodes for a bright spot pattern.
- Impact-resistant polycarbonate lens.
- Die-cast aluminum body with matte black finish.
